

MONTHLY MOTOR FUEL REPORTED BY STATES

NOVEMBER 2001

National Gasoline Sales January-November 2000 vs 2001 Change for U.S. +1.4% (+0.8%) (+1.2\%) (+1.2\%) (+

Based on all reported 2000 Data

Office of Highway Policy Information

Publication No. FHWA-PL-02-003

ELECTRONIC TABLES AVAILABLE ON THE INTERNET

The tables in this report can be found each month on the Office of Highway Policy Information webpage under **Products and Publications.** The publication is entitled **Monthly Motor Fuel Reported by States.**

The address is: http://www.fhwa.dot.gov/ohim.

QUESTIONS AND MAILING LIST CHANGES

If you have questions, need additional copies of this report, or wish to update our mailing list, contact:

Marsha A. Reynolds Federal Highway Administration Office of Highway Policy Information (HPPI) 400 Seventh Street SW Washington, DC 20590

Telephone: 202-366-5029 Facsimile: 202-366-7742

Mailing list updates/corrections should include a copy of your current mailing label.

IMPORTANT NOTICE

The Monthly Motor Fuel Reported by States report will be printed quarterly: March, June, September, and December. All other reports, including the quarterly reports, will be available on the FHWA Office of Highway Policy information Website at the following address:

http://www.fhwa.dot.gov/ohim

Motor Fuel Trends

Gasoline Sales

Based on reports of 42 States, gasoline consumption for January-November 2001 increased by 1.3 percent compared to the same period in 2000.¹ During this period, vehicle-miles of travel increased by 0.8 percent.

The gasoline volume shown in this report is a cumulative tabulation of gross volume reported by wholesale distributors to State motor fuel tax agencies. It includes highway use, nonhighway use and losses. There is a lag of up to 6 weeks between the wholesale transactions reported and retail sales to consumers. Travel trends are reported monthly in *Traffic Volume Trends* based on actual traffic counts at permanent traffic recorders operated by the State highway agencies and, thus, reflect only highway use of fuel. The vehicle-miles reported include all vehicles, regardless of fuel type. While data in both reports reflect changes in trends, large monthly changes can be caused by exceptional weather conditions, variations in timing of holidays, or processing delays.

Motor Fuel Taxation

All States levy volume taxes on gasoline and diesel fuel. The rates in effect for 2001 are shown in Table MF-121T. The gasoline rates vary from a low of 7.5 cents per gallon to 29 cents with an average of 19.96 cents. Four States provide for full or partial exemptions for gasohol, a blend of 90 percent gasoline and 10 percent fuel alcohol. Diesel fuel rates vary from 7.5 cents to 30.9 cents per gallon.

Traditionally, State fuel tax rates could only be changed with legislation, but 11 States now have variable rate motor fuel taxes. These taxes are adjusted at specified intervals--annually, semiannually, or quarterly--usually on the basis of an index or formula specified in the enabling legislation. These States are identified in the notes on Table MF-121T. Adjustments to variable rate taxes are announced by State tax agencies shortly before the effective date of the change. In addition to rate changes under variable rate tax laws, the following rate changes are anticipated through the end of 2002:

Hawaii	Effective 1/1/02, alternative fuels pay an amount proportional to the diesel tax (round to the nearest .1 cent and also add 1 cent to these amounts)—ethanol .29 times the diesel tax rate, bio-diesel .50 times the diesel tax rate, and LPG .33 times the diesel tax rate.
Kansas	Effective 7/1/01, gasoline and gasohol will increase to 21 cents per gallons, diesel will increase to 23 cents per gallons, and LPG will increase to 20 cents per gallon. Effective 7/1/03, gasoline and gasohol will increase to 22 cents per gallon, diesel will increase to 24 cents per gallon, and LPG will increase to 21 cents per gallon.
Mississippi	Effective by administration certification of two State programs, special fuel rates will drop to 14.75 cents per gallon.
Wisconsin	Effective 4/1/02, gasoline and diesel increased to 28.1 cents per gallon. Effective 4/1/02, LPG increased to 20.6 cents per gallon. Effective 4/1/02, compressed natural gas increased to 22.5 cents per gallon.

¹ This percentage change is a comparison for those States for which data are available for the report month. However, the percentage increase on the national map is a comparison of cumulative data for all States for which both 2000 and 2001 data are available.

United Kingdom	302	306
Japan	173	108
United States 2/	38	44

1/ Source for foreign rates is data collected by the U.S. Department of Energy from various sources. Rates were converted to U.S. currency using current exchange rates.

2 / Includes the weighted average of State taxes as shown on Table MF-121T plus the Federal tax.

Note to Users of Monthly Motor-Fuel "Retail Price" Data:

Beginning with the January 1997 issue, the Federal Highway Administration (FHWA) reinstituted motor fuel price data using data collected by the U. S. Department of Energy, Energy Information Administration (EIA) as the source for Table MF-5, "Retail Prices of Motor Fuel". The EIA Table 31 - "Motor Gasoline Prices by Grade, Sales Type, PAD District (Cents per Gallon Excluding Taxes)" will be used as the base information for the FHWA Table MF-5. The EIA data, which is based on the EIA-782 survey, was implemented in 1983 to fulfill EIA legislative requirements and community data needs. The FHWA will follow EIA protocols and requirements in making the data available to "Monthly Motor Fuel" customers.

Because the "Sales to End Users - Through Retail Outlets" data does not include Federal, State, and local taxes, FHWA will add Federal motor fuel and State motor fuel taxes to the EIA data. Federal Highway User Taxes (Table FE-21B) and State Tax Rates on Motor Fuel (Table MF-121T) are the FHWA sources for this data. Excluded from the total are other taxes such as local taxes and sales taxes applied to motor fuel, etc.

Users of Table MF-5 should consult the "Explanatory Notes" of the EIA Publication "Petroleum Marketing Monthly" (DOE/EIA-0380) before making use of the retail price information. The "Explanatory Notes" contain important information on the design of the sample, the continuity of the data, collection methods processing, non-disclosure, and revisions.

Pre-January 1997 retail price data was furnished by a source other than EIA. Because the sample design, collection methods, processing, and other data considerations differ between the two sources, users are particularly cautioned not to make direct comparisons of the data using previous MF-5 retail price data for any trend line comparisons.
