RE: Initial Report- City of Johnstown  
Special Experimental Project No. 14 (SEP-14)  
FHWA/I-IUD Jointly Funded Project  
ECMS Project # 92442

Dear Ms. Sigel:

The work plan for the above referenced project was approved February 8, 2013. The work plan identified that an initial report would be prepared to include industry reaction to the mix of funding sources, any identifiable effects on the bid prices received, and a copy of the bid tabs. Enclosed for your review is the initial report.

If you have any questions please contact Becki Mescher-Vuxta, Manager, Contract Awards, at [meschervu@pa.gov](mailto:meschervu@pa.gov) or 783-9680.

Sincerely,

George McAuley, P.E.  
Acting Director  
Bureau of Project Delivery  
Enclosure

---

**Pennsylvania Department of Transportation  
Initial Report Special Experimental Project No. 14 (SEP-14) HUD/FHWA Jointly  
Funded Project  
City of Johnstown, Project Number 92442**

PennDOT Central Office evaluated Project 92442 for the Main Street Improvements in Johnstown, Cambria County. This project was let on two dates, September 27, 2012, without HUD funds where all bids were rejected and again on March 14, 2013 with HUD funds. This project was originally bid with just PCTI funds and all the bids were rejected as the available PCTI funds were insufficient. For the rebid, the scope of the project was reduced by eliminating the tree removal to accommodate available PCTI and HUD funding.

The work plan measures are as follows:

1) *The Department will evaluate the effects of HUD 's economic opportunity requirements on competitive bidding by comparing the number of bidders for each let.* There were three bidders for each let with the same prime contractors bidding both times. However, the low bidder was not the same for each let. The attached bid results for both letting shows that the bids were very competitive for each letting.

2) *The Department will compare the bid amounts of each let.* The September 27, 2012 let had a low bid of \$1,358,419.23 and the March 14, 2013 let had a low bid of \$1,213,842.59, for a difference of \$144,576.64. All 149 bid items were reviewed for a comparison between the two lets and the results being both low bids were very close, indicating that the inclusion of HUD funding did not impact the bid costs. The only significant difference in the bid prices reflected the scope reduction. A copy of the bid tabs is attached.

3) *To the extent that bid information is available, PennDOT will evaluate the differences in bid prices or total bids with similar projects that do not have the local hiring preferences and explain any potential differences.* Twenty-seven projects were identified in PennDOT's electronic bidding and project management system "Engineering and Construction Management System (ECMS)" from the past five years in Cambria County. Of those, two projects had similar type work. Bid prices of the projects with a similar type of work were compared to Project 92442 and there were no apparent differences that were evident because of the HUD funding requirements.

4) *The Department will analyze the anticipated cost savings by avoiding the duplication of payment for inspection as well as avoiding any potential economic impacts to the area because of the construction duration of one project versus two.* This will be analyzed and reported upon project completion.

5) *The Department will monitor the employment preference in accordance with HUD 's Section 3 requirements.* This will be analyzed and reported upon project completion.

6) *The Department will provide an opinion from both the prime contractor and the contracting agency's representative on whether the hiring preference resulted in any additional costs or delays at the end of the project.* After the contract was awarded, a conversation with the prime

contractor revealed that he did not factor any additional costs into his bid based on the HUD Section 3 hiring preference. The prime contractor has indicated they will be using nine sub-contractors for this project, which have all been prequalified and approved by PennDOT. An opinion from both the prime and the City will be provided in the final report.

The above findings show there was no apparent difference between this project being let with just PCTI funding compared with the adding of HUD funding.
