

Table 3

Type II Noise Barrier Construction by State by Total Barrier Area Through 2007

Table 3 lists the twenty-four States that have constructed at least one Type II barrier (i.e., barriers constructed for an existing highway). It should be noted that the National Highway System Designation Act of 1995 restricted Federal participation in Type II noise barriers to those projects that were approved before November 28, 1995 or are proposed along lands where land development or substantial construction predated the existence of any highway.
