

Railroad-DOT Mitigation Strategies has also been selected to be one of FHWA's **Every Day Counts-3** initiatives, so a wide variety of support is available to help agencies and railroads interested in using this product.

## Benefits

Railroad volumes are expected to continue to grow, increasing the importance of effective project coordination between public highway departments and railroads. Railroad-DOT Mitigation Strategies cements understanding of each agency's needs and streamlines the coordination process, saving both time and money. Road users will also benefit from on-budget, rapid highway renewal.

## The Implementation Assistance Program

Implementation assistance is available to help State departments of transportation (DOTs), metropolitan planning organizations (MPOs), and other interested organizations deploy SHRP2 Solutions. A range of opportunities is available to raise awareness of SHRP2 Solutions and to encourage early adoption of these products. Application periods are offered approximately twice per year. Each product selected for implementation assistance has the potential to deliver more efficient, cost-effective programs to meet the complex challenges facing transportation today.

### About SHRP2 Implementation

The second Strategic Highway Research Program is a national partnership of key transportation organizations: the Federal Highway Administration, the American Association of State Highway and Transportation Officials, and the Transportation Research Board. Together, these partners conduct research and deploy products that will help the transportation community enhance the productivity, boost the efficiency, increase the safety, and improve the reliability of the Nation's highway system.
