Percentage	23.88	10.95	12.29	6.04	37.32	9.51	100.00

1/ This table is one of a series giving an analysis of motor-fuel consumption. A complete and uniform classification of nonhighway use is not possible due to differences among the States as to what classes of nonhighway use are eligible for exemptions or refunds and because some eligible refunds are not applied for. In order to make the data uniform and complete, nonhighway uses of gasoline were estimated by the Federal Highway Administration or data were obtained from other sources. The numbers shown in bold and italic are State-reported data, all other numbers, with exception of those described in Footnote 3, are from FHWA models or from other sources. These estimates may not be comparable to data for prior years due to revised estimation procedures. All data are subject to review and revision.

2/ Excludes aviation jet fuel.

3/ An amount is shown in this column only when reported by the State and when it could be determined that the State-reported figure did not include fuel represented in other categories.
