TOLL FACILITIES

IN THE UNITED STATES

Bridges - Roads - Tunnels - Ferries

February 1995

Publication No: FHWA-PL-95-034

PREFACE

This report contains selected information on toll facilities in the United States. The information is based on a survey of facilities in operation, financed, or under construction as of January 1, 1995.

Beginning with this issue, Tables T-1 and T-2 include, where known:

- The direction of toll collection.
- The type of electronic toll collection system, if available.
- Whether the facility is part of the proposed National Highway System (NHS).

A description of each table included in the report follows:

Table T-1 contains information such as the name, financing or operating authority, location and termini, feature crossed, length, and road system for toll roads, bridges, tunnels, and ferries that connect highways.

- Parts 1 and 3 include the Interstate System route numbers for toll facilities located on the Dwight D. Eisenhower National System of Interstate and Defense Highways.
- Parts 2 and 4 include a functional system identification code for non-Interstate System toll bridges, roads, and tunnels.
- Part 5 includes vehicular toll ferries.

Table T-2 contains a list of those projects under serious consideration as toll facilities, awaiting completion of financing arrangements, or proposed as new toll facilities that are being studied for financial and operational feasibility.

Table T-3 contains data on receipts of toll facilities.

- Part 1 includes data on receipts of State-administered toll road and crossing facilities.
- Part 2 includes data on receipts of local toll facilities. NOTE: Receipts for county and municipal tolls, as broken out in previous issues, are now combined and called local toll facilities.

Table T-4 contains data on disbursements of toll facilities.

- Part 1 includes data on disbursements of the State-administered toll road and crossing facilities.
- Part 2 includes data on disbursements of local toll facilities. NOTE: Disbursements for county and municipal tolls, as broken out in previous issues, are now combined and called local toll facilities.

This report is not intended to be a complete reference on toll facilities nor is it intended to duplicate data published by other organizations. Nearly all of the publicly owned toll authorities publish reports that contain such information as width and clearance on bridges, type of structure, road limits, year built or put in service, traffic volumes, cost, toll rates, etc.

Information on ferries such as seasonal or hourly operating schedules has been included when easily obtainable. Complete information on schedules and on the number and capacity of boats in operation may be obtained directly from the operating authority.

Other organizations also compile data related to toll facilities, including:

The International Bridge, Tunnel and Turnpike Association (IBTTA) maintains an address directory of its membership and serves as an information clearing house and research center. It also conducts surveys and studies and publishes a variety of reports, statistics, and analyses.

IBTTA
2120 L Street, NW., Suite 305
Washington, D.C. 20037
202-659-4620

The American Automobile Association (AAA) compiles a directory of toll facilities containing such current information as rates, load limits, frequency of service, etc.

American Automobile Association
1000 AAA Drive
Heathrow, Florida 32746-5063
407-444-7000

The data for this report were obtained by the field offices of the Federal Highway Administration (FHWA) in cooperation with the State highway agencies. The material was collected and organized by the Office of Highway Information Management. Comments are welcomed and may be submitted to:

Highway Systems Performance Division (HPM-20)

HISTORY

The early settlers who came to America found a land of dense wilderness, interlaced with creeks, rivers, and streams. Within this wilderness was an extensive network of trails, many of which were developed by wild beasts especially the American buffalo and used by the Native American Indians as hunting and trading routes. These primitive trails were at first crooked and narrow. Over time, these trails were widened, straightened, and improved by settlers for heavier use by horse and wagons. These became some of the first roads in the new land.

After the American Revolution, the National Government began to realize the importance of westward expansion and trade in the development of the new Nation. As a result, an era of road building began. This period was marked by the development of turnpike companies, our earliest toll roads in the United States. In 1792, the first turnpike was chartered and became known as the Philadelphia and Lancaster Turnpike in Pennsylvania. It was the first road in America covered with a layer of crushed stone. The boom in turnpike construction began, resulting in the incorporation of over 50 turnpike companies in Connecticut, 67 in New York, and still others in Massachusetts and around the country. A notable turnpike, the Boston-Newburyport Turnpike, was 32 miles long and cost approximately \$12,500 per mile to construct.

As the Nation grew, so did the need for improved roads. In 1806, the Federal Government passed legislation to fund the National Road, known as the Cumberland Road. This road would stretch from Maryland through Pennsylvania, over the Cumberland Mountains, to the Ohio River. For a period of time, these roads served the new Nation well. However, with the use of heavier wagons and the large movements of entire families across the country, a strain on the infrastructure was evident. The roads in this country were still dirt and gravel paved, rutted, and impassable in bad weather.

Toward the 1880s, the Nation began to see the increased use of bicycles as a form of transportation, which led to the "Good Roads Movement," mainly through bicyclist clubs across the country. In addition, with the advent of the automobile, new and better roads were required. The Federal Government stepped in with creation of the Office of Road Inquiry in 1893. This agency was responsible for collecting data, answering questions, and assisting in road improvements. Later, this infant agency grew to help finance road construction (Post Office Appropriation Act of 1912)--the beginning of the Federal-aid roads. Soon, connecting highways emerged from contributions from State and local governments as well as Federal Government financing. People were traveling further and more extensively.

World War I saw greater dependence on these vital roadways, especially the manufacturing centers. Following the war, the Federal Highway Act of 1921 provided financial assistance to the States to build roads and bridges. The need for a nationwide

interconnecting system of highways became clearer. By the end of the 1920s, over half of all American families owned automobiles. Engineers were kept busy building highways, bridges, and tunnels, especially in the larger cities such as New York, Boston, Los Angeles, and San Francisco. Tolls were used on many roads, bridges, and tunnels to help pay for such a building boom. The Holland Tunnel in New York was completed in the mid-1920s and opened up routes into the heart of New York City. It was referred to as the "Eighth Wonder of the World." The Golden Gate Bridge in San Francisco, built in the 1930s, provided access into San Francisco from across the Bay.

World War II brought even greater reliance on our vital highway systems. The roads, bridges, and tunnels served as defense routes for the war effort. Following the war, the urban flight saw mass building of the suburbs and increased use of the automobile. The Federal-Aid Interstate System, enacted in 1956, provided for a coast-to-coast highway system, connecting important cities and industrial centers to each other. This post-war boom saw one of the largest building of highways in the United States. The use of the automobile grew to include not only trips to work but to social activities and recreational outlets as well.

By 1980, the Nation's highway transportation infrastructure began to see signs of age through heavy use. Congestion in major urban area streets and highways, bridges, and tunnels grew rapidly and added to the wear and tear of the physical street and highway plant. Increased awareness on maintenance and repair led to increased financing from toll facilities. National attention on the need for maintenance and repair of our roads, bridges, and tunnels led to the 1981 Surface Transportation Assistance Act. More recently, the Intermodal Surface Transportation Efficiency Act of 1991 (ISTEA) was enacted which allows for increased reliance on the use of private funds to construct additional toll facilities. Tolls are now permitted to a greater degree on Federal-aid facilities, including initial construction of non-Interstate System toll facilities; 4R (resurfacing, restoring, rehabilitation, reconstruction) work on toll facilities; reconstruction or replacement of free bridges or tunnels and conversion to toll; and reconstruction of free highways (except Interstate System) and conversion to toll.

Today, toll roads, bridges, and tunnels are, to a great extent, financed by tolls through turnpike commissions and authorities, city and county operating authorities, and State Departments of Transportation. These turnpike authorities are essential for financing, constructing, and maintaining the Nation's toll roads, bridges, and tunnels around the country.

The Nation's highways are vital corridors for our economic and social progress. The cooperation between the Federal, State, and local governments, as well as private entities, makes toll facility financing and construction a viable resource alternative as we move into the 21st Century.

	Total Ferry Facilities		105,874	6,085	108,426	101,060	8,200	3,529	53,976	30,199	305,390
	Grand Total		5,367,617	1,432,649	301,551	3,484,345	103,069	327,623	187,933	3,928,706	8,333,227

1/ Tables SF-3B and SF-4B are concerned solely with receipts and disbursements for State and quasi-State toll facilities. See Tables LGF-3B and LGF-4B for data on public and quasi-public facilities operated by or for local governments. See Tables SB-2T and SB-3T for information on toll facility bond indebtedness. See Table SF-21 for general note on SF table series.

2/ Any differences between beginning balances and previous year's closing balances are the result of accounting adjustments, or inclusion of funds not previously reported.

3/ Private companies have contracted with the State to build and operate these facilities, and transfer them to the State at a later date. The amounts shown represent only the State's oversight costs.

4/ The toll portion of the new congestion relief route is not included in this table. Capital outlay for 1993 is included in the State expenditures for State administered roads.

5/ 1993 annual report not received. Debt service shown is for 1993. All other amounts shown are for 1992.

6/ Facility not open. Still under construction during 1993.

7/ Seminole County Expressway became part of Florida Turnpike per October 10, 1990 agreement.

8/ Freed 7/1/92.

9/ Reclassified as a State Facility. Shown as a local toll facility prior to 1993.

10/ Includes Chesapeake Bay, Francis Scott Key, Potomac River and Susquehanna River Bridges; Baltimore Harbor and Fort McHenry Tunnels.

11/ Includes the Trenton-Morrisville, New Hope-Lambertville, Interstate 78, Easton-Phillipsburg, Portland-Columbia, and Milford-Montague Bridges.

12/ Includes the Newburgh-Beacon, Mid-Hudson, Rip Van Winkle, Kingston-Rhinecliff and Bear Mountain Bridges.

13/ Includes the George Washington, Bayonne and Goethals Bridges; Holland and Lincoln Tunnels.

14/ Includes the Walt Whitman, Ben Franklin, Betsy Ross and Commodore Barry Bridges.

15/ Full name of the authority is West Virginia Parkways, Economic Development and Tourism Authority.

RECEIPTS OF LOCAL TOLL FACILITIES - 1992₁

Washington	Guemes Island Ferry	Skagit County	-	329	-	-	316	-	645
	Lummi Island-Gooseberry Point Ferry	Whatcom County	-	424	-	-	373	-	797
	Puget Island Ferry	Wahkiacum County	-	112	-	-	242	-	354
	Steilacoom (Tacoma-McNeil-Anderson) Ferry	Pierce County	-	535	-	-	644	-	1,179
	Total		-	1,400	-	-	1,575	-	2,975
West Virginia	Parkersburg Bridge	City of Parkersburg	738	1,116	-	18	-	-	1,134
Wisconsin	Cassville Car Ferry	Cassville Harbor Commission	17	64	1	1	1	-	67
Summary	Total Bridge and Tunnel Facilities		834,519	840,955	7,711	34,915	33,279	29,520	946,380
	Total Road Facilities		943,440	84,901	-	39,284	101,678	154,355	380,218
	Total Ferry Facilities		115	6,579	1,176	1	32,217	-	39,973
	Grand Total		1,778,074	932,435	8,887	74,200	167,174	183,875	1,366,571

¹ This table summarizes the receipts for publicly owned toll facilities operated by local governments, local road and bridge districts and specially created authorities. See Table LGF-21 for general note on local highway finance series.

² Park Boulevard Bridge freed in 1991.

³ Reclassified as a State facility, and will be shown in Table SF-3B in future years. Miscellaneous income shown includes \$3,964,357 from State motor-vehicle license tax.

⁴ Estimated by FHWA. Data not reported.

⁵ Miscellaneous income shown includes \$13,425,750 in State aid and a \$16,129,872 subsidy from New York City.

DISBURSEMENTS OF STATE-ADMINISTERED TOLL ROAD AND CROSSING FACILITIES - 1993¹

1/ Tables SF-3B and SF-4B are concerned solely with receipts and disbursements for State and quasi-State toll facilities. See Tables LGF-3B and LGF-4B for data on public and quasi-public facilities operated by or for local governments. See Tables SB-2T and SB-3T for information on toll facility bond indebtedness. See Table SF-21 for general note on SF table series.

2/ Includes direct expenditures for nonhighway purposes and transfers to other agencies for both highway and nonhighway purposes. The amount used for nonhighway purposes can be determined by taking total tolls from SF-3B and subtracting tolls used for highways on Tables SF-21 and tolls used for mass transportation on table MT-1.

3/ Private companies have contracted with the State to build and operate these facilities, and transfer them to the State at a later date. The amounts shown represent only the State's oversight costs.

4/ The toll portion of the new congestion relief route is not included in this table. Capital outlay for 1993 is included in the State expenditures for State administered roads.

5/ 1993 annual report not received. Debt service shown is for 1993. All other amounts shown are for 1992.

6/ Facility not open. Still under construction during 1993.

7/ Seminole County Expressway became part of Florida Turnpike per October 10, 1990 agreement.

8/ Freed 7/1/92.

9/ Reclassified as a State Facility. Shown as a local toll facility prior to 1993.

10/ Includes Chesapeake Bay, Francis Scott Key, Potomac River and Susquehanna River Bridges; Baltimore Harbor and Fort McHenry Tunnels.

11/ Includes the Trenton-Morrisville, New Hope-Lambertville, Interstate 78, Easton-Phillipsburg, Portland-Columbia, and Milford-Montague Bridges.

12/ Includes the Newburgh-Beacon, Mid-Hudson, Rip Van Winkle, Kingston-Rhinecliff and Bear Mountain Bridges.

13/ Includes the George Washington, Bayonne and Goethals Bridges; Holland and Lincoln Tunnels.

14/ Includes the Walt Whitman, Ben Franklin, Betsy Ross and Commodore Barry Bridges.

15/ Full name of the authority is West Virginia Parkways, Economic Development and Tourism Authority.

¹ This table summarizes the disbursements for publicly owned toll facilities operated by local governments, local road and bridge districts and specially created authorities. See Table LGF-32 for names of operating authorities. See Table LGF-21 for general note on local highway finance series.

² Includes direct expenditures for nonhighway purposes and transfers to other State and local agencies for both highway and nonhighway projects.

³ Park Boulevard Bridge freed in 1991.

⁴ Reclassified as a State facility, and will be shown in Table SF-4B in future years.

⁵ Estimated by FHWA. Data not reported.

⁶ Transfers shown include amounts used for maintenance, operations and debt service of the New York City Transit Authority, the Metropolitan Transportation Authority and the Triborough Transportation Project.
