

MECHANISTIC-EMPIRICAL PAVEMENT DESIGN GUIDE 2004 Workshops

Workshop for M-E Pavement Design Guide

- **Informative**
- **Educational**
- **Designed to assist FHWA's customers and partners in their implementation programs for M-E pavement design**

Design Guide Implementation Team:

Katherine Petros
202.493.3154

Leslie Myers
202.366.1198

Monte Symons
404.562.4782

Sam Tyson
202.366.1326

You may also contact each of the team members at this email address: DGIT@fhwa.dot.gov

It has been over four decades since the AASHTO road test, which is the basis for most pavement design. Throughout the course of those decades, many methods and pavement design procedures have evolved. Some of these changes came about because of new technology, regulations, and the increase of traffic. It's time to reshape the way we think and develop solutions for challenges that face us today.

This new pavement mechanistic-empirical (M-E) design guide will help bring your program up to date utilizing the latest pavement methods.

Please plan to attend one of these 2004 workshops scheduled to introduce the M-E Pavement Design Guide to FHWA field offices and State DOTs:

Dates	Locations
May 25	Biloxi, MS
June 23	Vancouver, WA
July 15	Indianapolis, IN
July 20	Honolulu, HI
August 26	Mystic, CT
September 14	Kansas City, KS
October 20	Phoenix, AZ

The workshops will provide you with the additional information and technical assistance to help you plan an implementation program. There will be additional workshops that will address materials and other details of the new pavement design guide.
