HIPA-30

To: Russell L. Jorgenson  
Division Administrator  
Lansing, MI

This is in reference to Jeff Forster's May 13 email that transmitted the Michigan Department of Transportation's (MDOT) SEP-14 workplan for the use of a variable scope contracting method to install six to eight cameras on US-23 between M-14 and Lee Road in MDOT's University Region.

This contracting method will allow MDOT to maximize the greatest amount of work with a budget not to exceed \$1,200,000. The successful proposer will be selected on a best-value basis based on their prices for selected options.

The MDOT's workplan and evaluation schedule are satisfactory. You may consider this project approved for evaluation under SEP-14. Thank you for the opportunity to review and comment on this SEP-14 request. Should you have any questions, please contact Gerald Yakowenko at (202) 366-1562.
