PhillyFreightFinder

Freight Data Portal for the Delaware Valley

FHWA Talking Freight

Michael Ruane
Office of Freight and Aviation Planning
Delaware Valley Regional Planning Commission

Project Overview

- Background on PhillyFreightFinder
- Impetus for development
- Technical overview
- Data, data, and more data
- Replication of PhillyFreightFinder

DVRPC Region

MPO for Greater Philadelphia

9 county, bi-state region (PA,NJ)

The Delaware Valley is a premier freight transportation gateway. The performance of its extraordinary network helps promote and support a thriving economy.

PhillyFreightFinder is a resource for exploring and tracking this Philadelphia-Camden-Trenton regional freight network.

Background

AN **ONLINE, INTERACTIVE** PLATFORM FOR SHARING FREIGHT NETWORK **DATA TO ENHANCE THE UNDERSTANDING** OF PERFORMANCE AND VALUE OF FREIGHT IN THE REGIONAL ECONOMY

LAUNCHED 2013

With support from the DVRPC Freight Advisory Committee, the initial product was made public in 2013. The FAC assisted with identification of data and included a mix of public and private-sector members.

DVRPC FREIGHT

PhillyFreightFinder was built internally through the DVRPC freight office, building on a foundation of technical work that was conducted over 20+ years. The project remains an integral part of the annual work of the DVRPC Office of Freight.

Why build *PhillyFreightFinder*

- Expand reach of freight planning efforts
- Improve visibility + availability of freight data
- Educate regional planners and the public
- Develop better data sharing with public- and private-sectors

Technical Overview

FRONTEND APPLICATION

- Built 100% in-house
- Flexible, lightweight
- Open Source code
- Independent of Esri stack

BACKEND MANAGEMENT

- ArcGIS Server
- Python for data intake
- Automation of data updates built-in to workflow

Freight Data Portal for the Delaware Valley

The Delaware Valley is a premier freight transportation gateway. It possesses one of the world's busiest freshwater ports; rail freight service from two large Class I railroads and 12 smaller short lines; an airport with expanding international cargo services; an excellent highway and connector network; and numerous rail and port intermodal terminals.

The performance of this extraordinary network helps promote and support a thriving economy. *PhillyFreightFinder* is a resource for exploring and tracking the Philadelphia-Camden-Trenton regional freight network.

Get started below

County Freight Profiles

The DVRPC region is comprised of nine counties, each with a unique freight profile of facilities, employment, and trade patterns. The County Profile Tool provides insights on these unique aspects.

[Explore a county](#)

Performance Indicators

A key to understanding freight in the Delaware Valley is evaluating the performance of the facilities that support freight in the region.

[View Highway Performance](#)

[View Maritime Indicators](#)

Explore Our Network

The region's extensive network includes hundreds of individual facilities that function together to drive the economy. Our map tool allows you to explore key details and facts about each of these facilities.

DVRPC Region | Overview

overview

network

trade patterns

The Delaware Valley region consists of nine counties: Bucks, Chester, Delaware, Montgomery and Philadelphia in Pennsylvania, and Burlington, Camden, Gloucester and Mercer in New Jersey.

The DVRPC region contains an impressive freight transportation network consisting of highways, rail lines, ports, airports, and pipelines. These key linkages unite an expansive list of facilities including warehouses, manufacturing sites, rail yards, and truck stops.

Strategically positioned in the middle of the densest population center in the United States; over 100 million people live within a 500-mile radius of Philadelphia, representing a vast consumer base and making the region ideally situated as a manufacturing and distribution hub.

Philadelphia County | Network

overview

network

trade patterns

Like powerful Internet networking tools, Philadelphia, Pennsylvania's freight system affords rapid, productive, and global connections. Once known as the *Workshop of the World*, Philadelphia now serves as the calling card of the Delaware Valley region's impressive freight assets. For even the casual observer, the City's prominence in international commerce is abundantly evident: mammoth container cranes, multi-cultural company logos, and non-stop daily pick-up and delivery patterns dot the landscape.

Data, data, and more data!

WHAT WE LEARNED

- **recency/frequency** is a key consideration
- **consistency and reliability** impact the utility of data for planning and tracking purposes
- telling the story of freight with data requires an ongoing commitment

HAVE A PLAN

be clear in your practical uses of all the data you collect as it makes it easier to adapt to availability and budgetary restrictions

Value to our partners

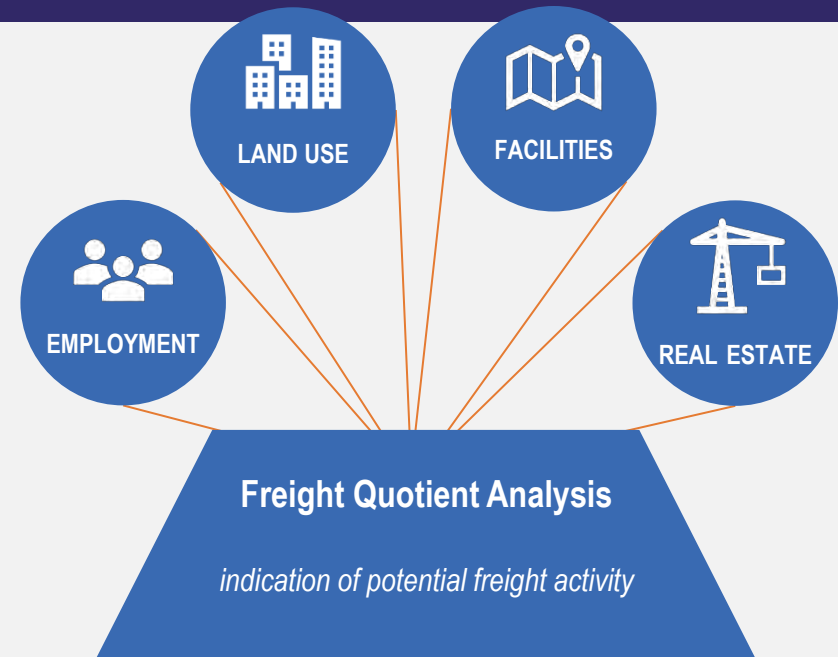

- County planners have expanded freight planning capacity
- Engaged new partners (public + private)
- Centralized, accessible data resource for region
- Foundation for additional performance measure tracking

ADDED VALUE TO OUR WORK

being a resource **improves visibility** of all our products and **improves the quality and level** of input we get in our process

Improved Freight Center Analysis

- Better data driven process
- New typologies
 - International Gateway
 - Heavy Industrial
 - Distribution & Logistics
 - High Tech Manufacturing
 - Local Manufacturing and Distribution

Distribution & Logistics

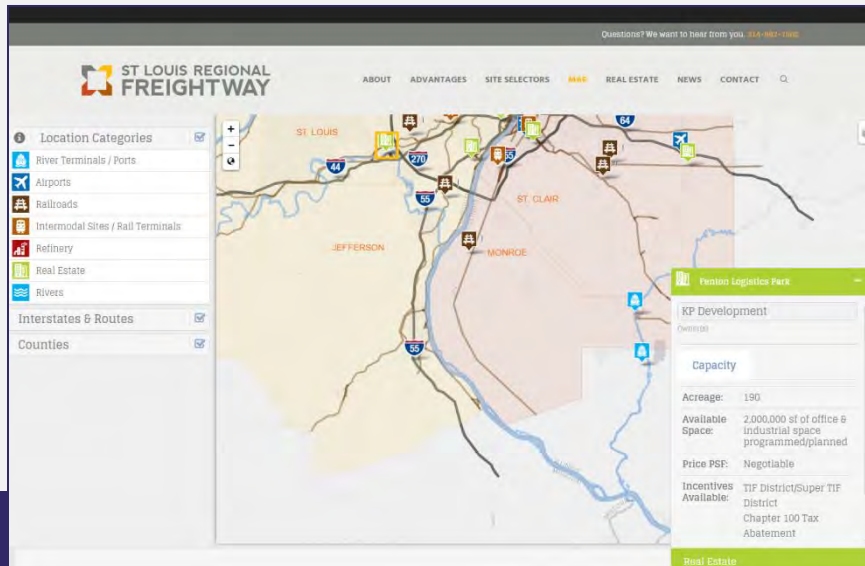

Local Manufacturing

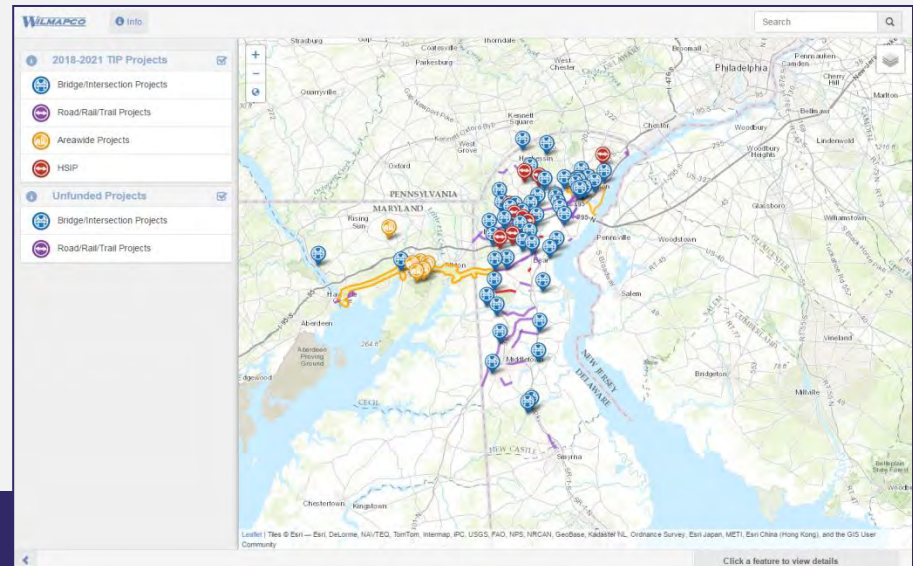

High Tech

Replicate *PhillyFreightFinder*

- Full code is available for replication
- **Open Freight App:** Documented version for simple map interface
