

INNOVATION EXCHANGE

Conversations Launching Change

Discussions targeted to Local Agencies, Tribes
and Federal Land Management Agencies programs

Hurricanes, Floods, Tornadoes, and Earthquakes

When disaster strikes, time is of the essence. Every minute, hour, and day matters when making damage assessments in the aftermath of a powerful hurricane, flood, or storm. Technology saves time and can be critical to efforts to get roads and bridges open to traffic again after a natural disaster.

Rip up your paper forms, maps, tedious spreadsheets and outdated tools and use...

The FHWA Mobile Solution for Assessment and Reporting (MSAR) software is helping states, tribes, and federal land management agencies repair damaged transportation infrastructure sooner and saving taxpayers money. Join us for real case studies and a live demo to show how you can respond to the next disaster with faster assessment, data clarity, and transparency.

Please join in on this webinar to hear how outdated methods can be put to the side and replaced with MSAR to speed up on-the-ground damage assessments during a disaster event.

Mobile Solutions for Assessment and Reporting Application

November 8, 2018
11:00 AM -1:00 PM [EST]

To join the webinar, participants **must register** to participate. Wherever possible, we encourage you to attend from a conference room where everyone can gather as a group.
