

INNOVATION EXCHANGE

Conversations Launching Change

Discussions targeted to Local Agencies, Tribes
and Federal Land Management Agencies programs

High Friction Surface Treatment (HFST) is a viable option to address crashes at curves and intersections that are related to wet weather or polished pavements.

This webinar will explore the experience of the incorporation of HFST in two projects in the Grays Harbor County on Wynoochee Valley Road, near Montesano, Washington and on the Natchez Trace Parkway 9 miles NE of Tupelo, MS. This project was carried out by the Federal Lands Highway of the FHWA.

Please join us for practical applications and considerations for using this innovation.

High Friction Surface Treatment

Tuesday, March 6, 2018
1:00 pm to 2:30PM [EST]

To join the webinar, participants **must register** to participate. Wherever possible, we encourage you to attend from a conference room where everyone can gather as a group.
