

INNOVATION EXCHANGE

Conversations Launching Change

Discussions targeted to Local Agencies, Tribes
and Federal Land Management Agencies programs

Have you wished there was an easy way to improve the sustainability of your construction projects?

Are you looking for a way to guide sustainable decisions throughout the project delivery process?

Do you need to elevate the sustainable transportation conversation in your agency?

The *Innovation and Sustainability Evaluation Process (INSTEP)* may be just the tool you are looking for. *INSTEP* was developed by the National Park Service (NPS) to facilitate and encourage sustainable transportation projects. The tool encourages sustainable design practices, shares and tracks sustainable strategies and achievements, and serves as a repository for sustainable polices, legislation, laws and regulations.

Join us to learn about *INSTEP*'s pilot used on eight diverse projects. Project participants agreed that *INSTEP* helped develop a higher level of understanding of sustainable practices and metrics that can be applied to transportation projects.

Presenters will include Jan Burton, Landscape Architect and Project Manager for the NPS and Will Wagenlander, Projects Manager, Lead Planner with WSP consultants.

Innovation and Sustainable Transportation Evaluation Process (INSTEP)

Thursday, May 25, 2017
11:00 AM-12:30PM [EST]

To join the webinar, please use the following web room and call-in information:

Web room:

<https://connectdot.connectsolutions.com/instep/>

Call-in:

877-336-1839, Access Code: 3947009

The meeting room has a maximum capacity of 100 connections. Wherever possible, we encourage you to attend from a conference room where everyone can gather as a group.

For additional information please contact John Seabrook at richard.seabrook@dot.gov (email)

We look forward to your participation!
