

To update the configuration file to point to the production ArcGIS Runtime license you have been provided to run RCNM 2.0 please:

1. Navigate to the following folder - C:\Program Files (x86)\GeoDecisions\GeoCNM\
NCHRP.CNM
2. Open up the following file in any text editor (i.e. NotePad) -
Geo.Windows.App.exe.config
3. Scroll about ¾ of the way down the content to identify the following code lines:
4. <appSettings file="LocalSettings.config">
5. <add key="esri.runtime.license" value="this string will be provided to you by your Esri license manager" />
6. In the line noted by the esri.runtime.license replace the highlighted text string in quotes with the license string provided to you via email from your organization's Esri license manager.
7. Save the file and exit the text editor application
8. Start up the RCNM 2.0 application
