* Initially, Texas triggered the 95 percent minimum provision in FY 2021. As such, the apportionments for Texas were adjusted upward accordingly and the apportionments for all other States were required to be adjusted proportionally downward equal to the amount of the total upward adjustment in order to not exceed the total funds authorized for apportionments. However, the proportional downward adjustment caused Colorado to drop below the 95 percent threshold. As such, the apportionments for Colorado were then adjusted upward accordingly and the apportionments for all other States except Texas were required to be adjusted proportionally downward equal to the amount of the total upward adjustment in order to not exceed the total funds authorized for apportionments.

¹ After programmatic distribution of Equity Bonus, inclusive of State Planning and Research (SPR) funding.

² N/A = no changes in designation; each State's adjusted FY 2009 CMAQ share was calculated in isolation (i.e., unadjusted weighted population data was used for other States); States in gray are below the 1/2% minimum share and, therefore, a portion of their CMAQ funding is flexible.

³ Flexible share = 1 - (initial share/0.005).

⁴ Initial flexible CMAQ amount unless superseded by flexible CMAQ amount based on change in nonattainment/maintenance area designation.
