

A white utility vehicle, possibly a maintenance truck, is parked on the shoulder of the road. It has emergency lights on its roof and a license plate that reads "1E-30021".

A red semi-trailer truck is visible in the background, parked on the right side of the road.

A concrete overpass or bridge structure spans across the road in the background. It has a metal railing along its edge.

The road is paved asphalt and curves to the left. It features a solid yellow line on the right side and a white line on the left side.

A large, bent metal guardrail is in the foreground. It is severely damaged, with several sections broken and twisted. A yellow and black striped warning sign is attached to one of the broken pieces. The guardrail is situated on a gravel shoulder next to the road.
