*Provide partial reimbursement to Concrete and Asphalt plants for the development of EPDs.*

## Project Goals:

Incentivize the development of EPDs in the Concrete and Asphalt industry sectors.

## Project Scope:

- Support the development of environmental product declarations (EPDs) in the asphalt and concrete industries by reimbursing some of the costs it takes to develop EPDs on mixtures used on Caltrans projects. Each supplier will be eligible for a maximum reimbursement of \$1,500 per plant, with a total reimbursement cap of \$4,500 per company, per material (concrete or asphalt) in preparation for future spec requirements.
