NDDOT Sustainable Pavements Evaluation

Project Goals:

- (1) Establish an informed and trained core group of stakeholders to better understand sustainable pavements, materials, and processes through EPDs.
- (2) Create a Request For Proposal (RFP) to solicit academic & consultant assistance to establish an HMA materials-based EPD collection system.
- (3) Develop a process, guides, documentation, evaluation tools, and data collection methods to quantify GHG emissions and make project level decisions.

Project Tasks:

- **Training** - Provide training, workshops, and demos of tools to the NDDOT and stakeholder sustainable pavement team.
- **Proposal Development** - Develop a request for proposal to solicit academic and consultant expertise for a Sustainable Pavements Evaluation Process and any associated tools or data collection processes.
- **Develop a Sustainable Pavements Evaluation Process** - Work with stakeholder partners on the final proposal, schedule, and deliverables needed to develop a Sustainable Pavements Evaluation Process.
