

INNOVATION EXCHANGE

Conversations Launching Change

Discussions targeted to Local Agencies, Tribes
and Federal Land Management Agencies programs

*Who is into hydraulics? Not speaking of car
suspensions that is...*

Collaborative Hydraulics Advancing to the Next Generation of Engineering (C.H.A.N.G.E) is coming. It is now time to toss away the process of one-dimensional (1D) modeling and learn a new process called (2D) modeling.

Users of (2D) modeling can **create better representations** of the interaction between transportation assets, also, riverine and costal environments. Advance graphic features will surely improve environmental, regulatory, and engineering impediments to multiple project deliveries.

Are you ready to get your hands on new modeling software? Then attend the webinar first. Join us on Thursday, July 25, 2019 from 1:00 PM to 2:30 pm [EST].

*I can (up), can I (up) grade you? Partner, let me
upgrade you.*

(C.H.A.N.G.E) The Next Generation of Engineering

Thursday, July 25, 2019
1:00PM -2:30 PM [EST]

To join the webinar, participants **must register** to participate in the meeting room. Wherever possible, we encourage you to attend from a conference room where everyone can gather as a group.
