The Regional Roundtables provide an opportunity for the Community of Practice to share their Road

Weather Management experiences with other practitioners.

As shown below, the country is divided into 6 areas composing of 2 regions in each Roundtable meeting. Please visit the [Road Weather Management Exchange \(RWMX\)](#) for additional information and resources. The RWMX web portal is open to the public and dedicated to the exchange of information on all Road Weather Management topics among practitioners and professionals.

## Agenda

The focus of the Roundtables will be hot topics and updates from each State. This will include a discussion on flooding – an increasingly important topic to transportation agencies. Roundtable agendas will be posted on the [Road Weather Management Exchange \(RWMX\)](#).

Please contact either Road Weather Management Co-Host as noted if you would like to be on the agenda for your respective regional Roundtable.
