OFFICE OF INNOVATIVE PROGRAM DELIVERY

Four 'Simple' Questions

Q. **Where** do you go if you have an innovative idea?
(individual, industry, or DOT)

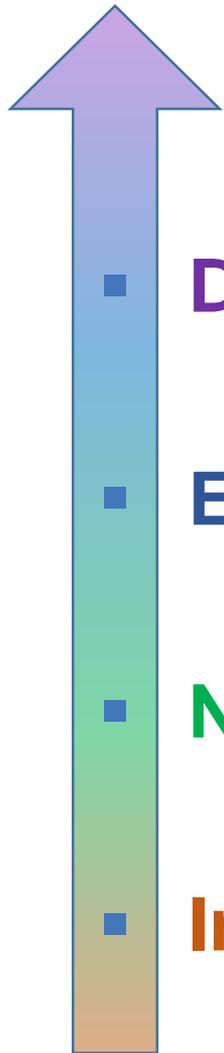

Q. **What** support is available?

Q. **How** can you get to **MARKET READY**?

Q. **How long** does all this take?

Impact of Innovation

- **Disruptive** ✓ *Game Changing*
- **Emerging** ✓ *Gap Filling, significantly advance the state-of-the-art*
- **Noteworthy** ✓ *Significantly advance conventional practice*
- **Incremental** ✓ *Advance the state-of-the-practice*

TRANSFORMATIVE

Measure of Outcome of Innovation

- Quantitative ✓ *Return on Investment (ROI)*
- Qualitative ✓ *Derived Value (DV)*
- Marketing ✓ *Success Stories (Mar/Com)*

FYI: AASHTO Value of Research (VOR) Task Force

Is there a Chasm between Research & Practice?

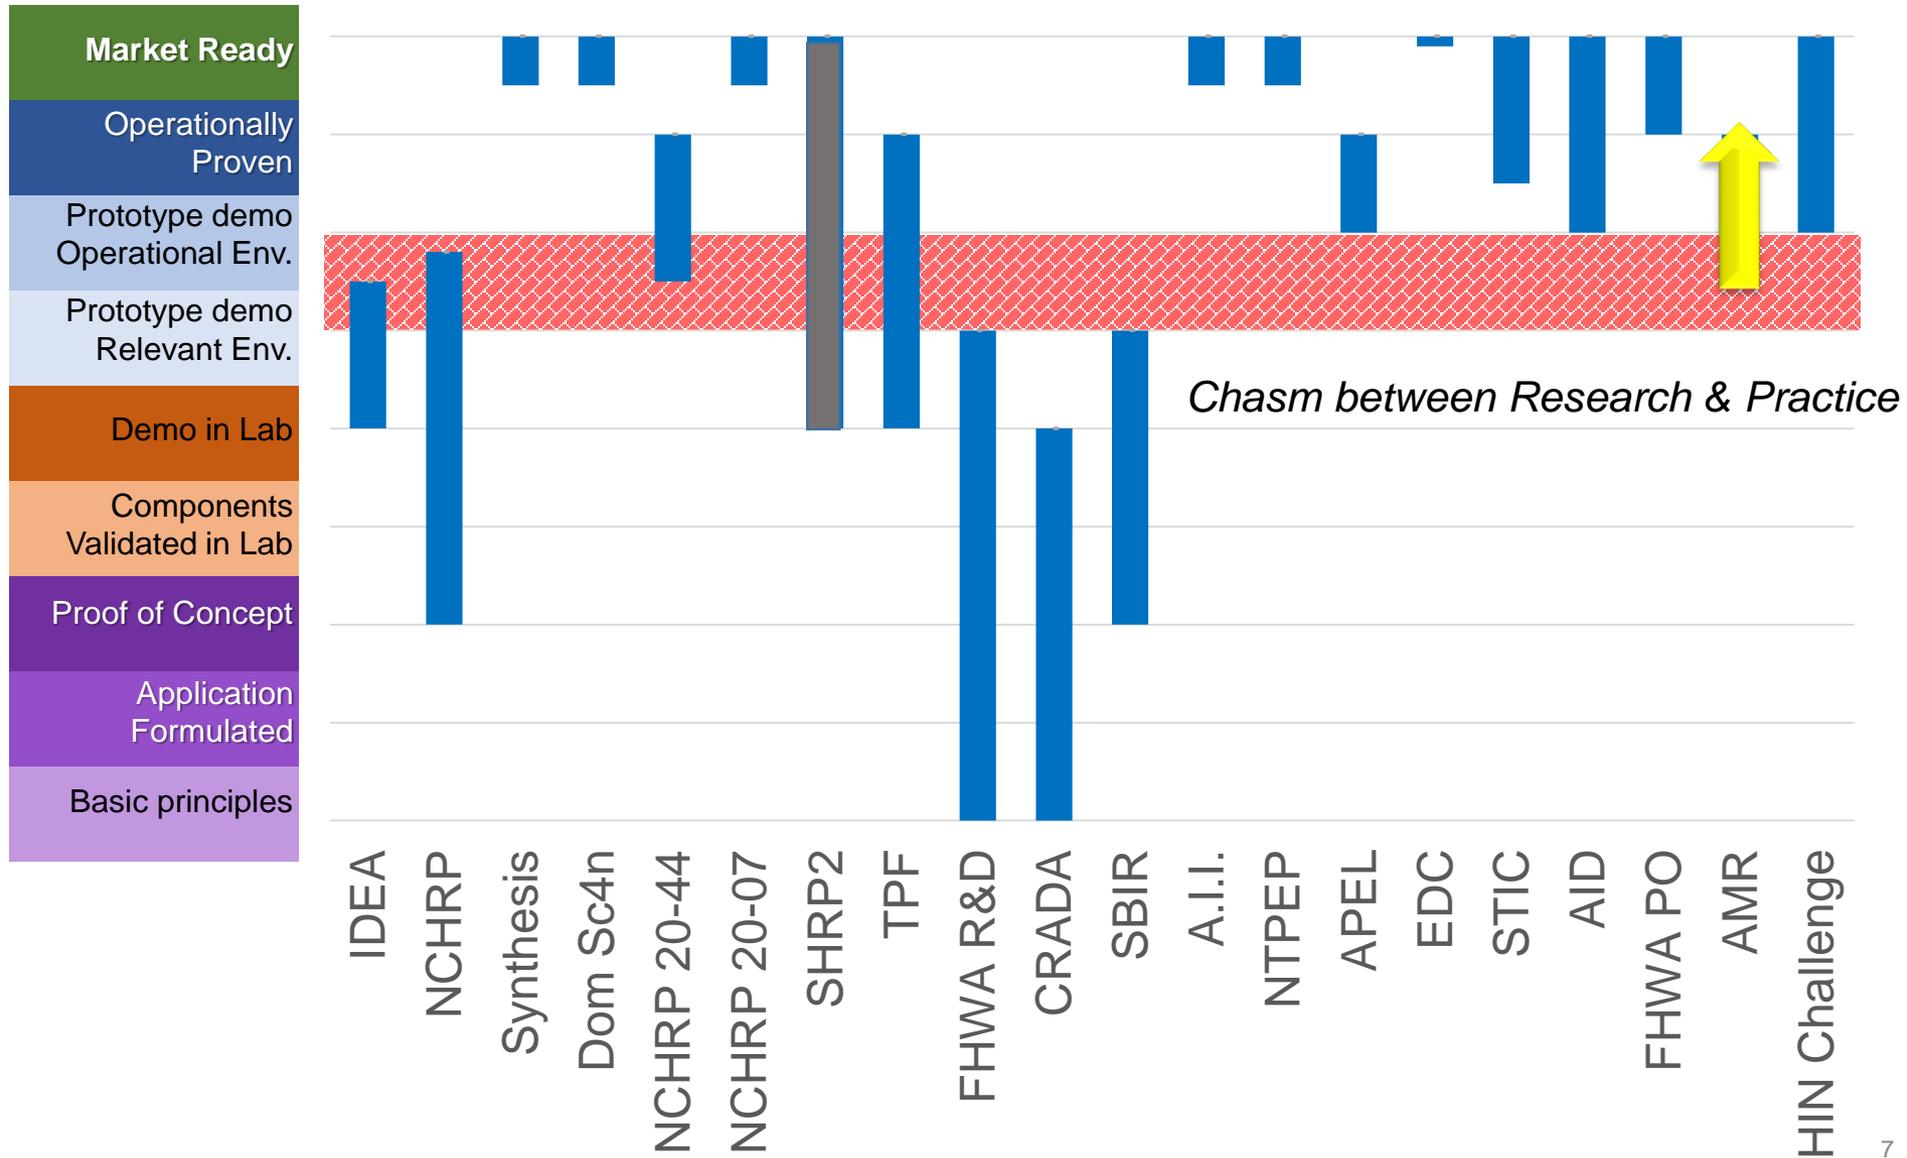

Market Readiness of Innovation: Technology Readiness Level (TRL)

Basic Research TRL 1 to 3	Applied Research TRL 4 to 5	Development TRL 6 to 8	Implementation TRL of 9
<ol style="list-style-type: none">1. Basic principles and research2. Application formulated3. Proof of Concept	<ol style="list-style-type: none">4. Components validated in a laboratory environment4. Integrated components demonstrated in a laboratory environment	<ol style="list-style-type: none">6. Prototype demonstrated in relevant environment7. Prototype demonstrated in operational environment8. Technology proven in operational environment	<ol style="list-style-type: none">9. Technology refined and adopted <p>- <i>EDC Innovations are a TRL of 9</i></p>

Technology Readiness Level (TRL) Range of National RD&T Programs

23USC503(c) Technology and Innovation Deployment Program (TIDP) Goals

- Significantly accelerate adoption of innovative technologies...
- Provide leadership and incentives
- Construct longer-lasting highways
- Improve highway efficiency, safety, mobility, reliability, service life, environmental protection, and sustainability
- Develop and deploy new tools, techniques, and practices to accelerate the adoption of innovation

OIPD- CAI TIDP Programs

Fostering a Culture of Innovation

AID Demo

Accelerated Innovation Deployment

Missouri Department of Transportation—

Nano-coating Technology for Bridges

NEW - Big Bend Boulevard Bridge over I-270 in east central St. Louis County

Source: Fox2

TRL = 8

- Mo DOT's current painting system involves a 3 coat system with lengthy closure time.
- New product called Tesla Nano-coating: forms a passive corrosion protection system that only requires two coats with the second coat being applied prior to drying.

Concept: NEW Accelerating Market Readiness (AMR)

...to provide resources for the rapid, national assessment of emerging innovations and to provide transportation offices with objective-written assessments to accelerate the adoptions of innovations that meet their unique needs.

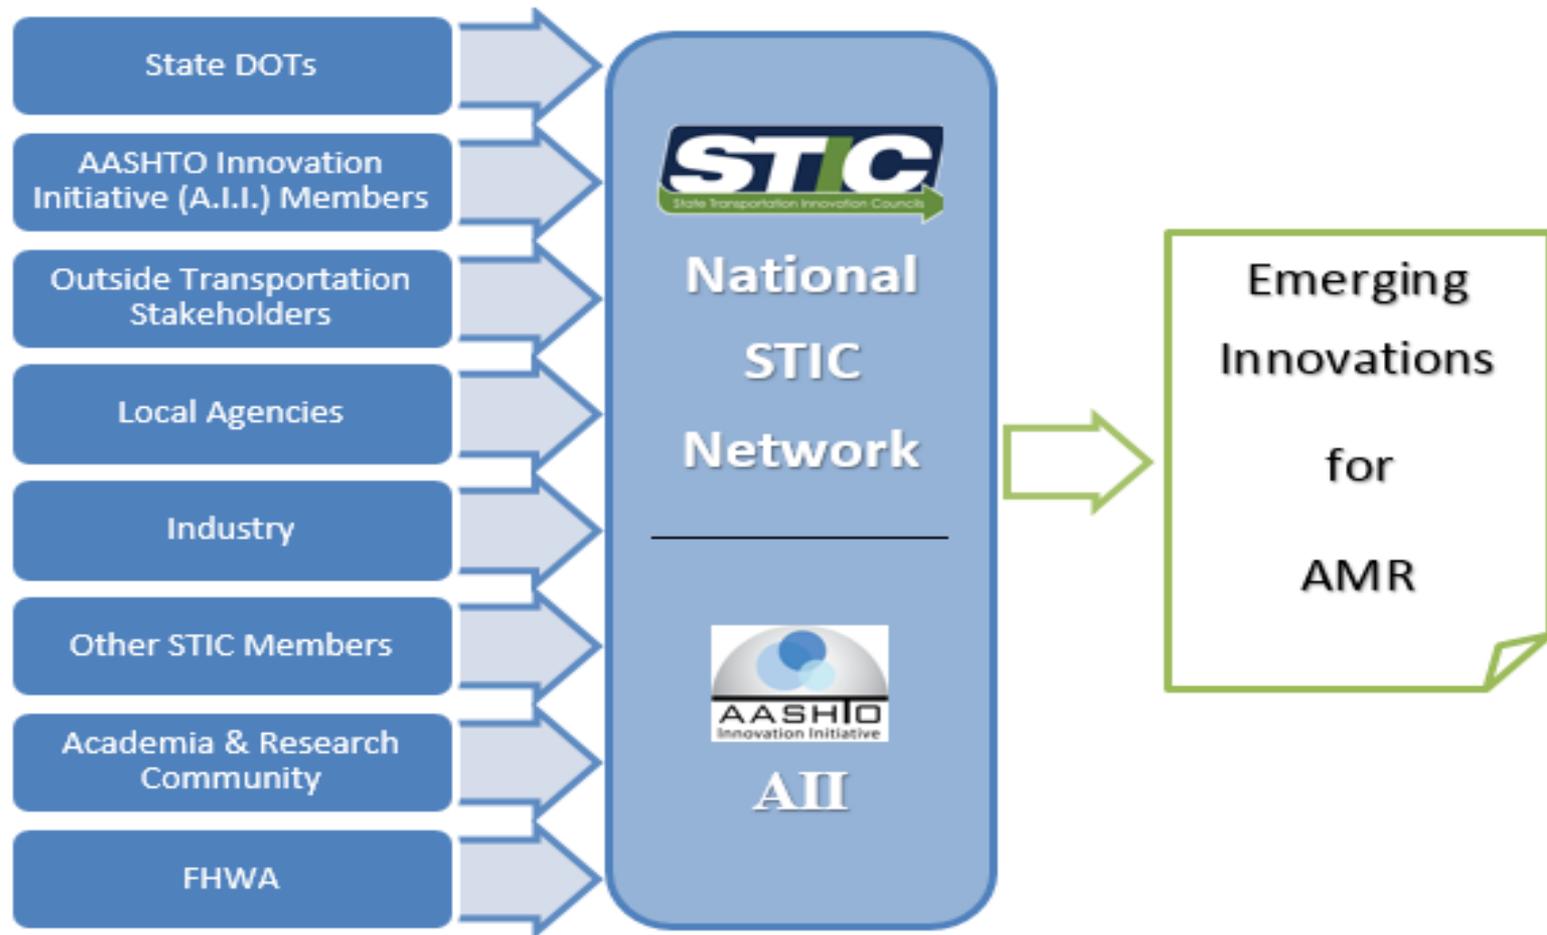

Goals of new Program

Provide a rapid, national assessment of emerging innovations...

- ✓ Provide a **shared-risk environment**
- ✓ Provide sound, objective, detailed, and coordinated evaluation and **reporting**
- ✓ Provide **marketing and communication**
- ✓ Help feed the **EDC pipeline**
- ✓ Provide a pathway between research and practitioner
- ✓ Identify future areas for research and development

BAA - AMR Solicitation

FHWA / STIC feed AMR

Evaluation Criteria

1. Does the innovation have the potential to significantly advance conventional practice? **Transformative**
2. Does the innovation have potentially high demand for implementation? **Demand**
3. Is the innovation substantially developed? **TRL 6+**
4. Does the innovation have the potential to be included in the EDC cycle? (*aspirational*) **EDC?**

Proposed Funding

Up to \$5 million dollars annually (TIDP)

Opportunity to leverage other complementary programs (e.g. AID and STIC Incentive)

Range from \$100 to \$500k per innovation

- Delta Costs for Innovation and Report Writing
- Support Findings with Mar/Com
- Leverage National STIC Network in dissemination & AASHTO All (APEL for posting)
