1 The registrations given in this table are as reported by the States in most instances, but have been supplemented in some cases by estimates based on data from other sources.
 2 In this partial classification a vehicle may be included more than once; for instance, a truck-tractor in farm use could appear in both columns.
 3 The figures in these columns may vary substantially from the numbers shown for prior years. This results from new information, such as the 1992 Census of Transportation Truck Inventory and Use Survey, and changes in the estimating procedures, and is not because of substantial vehicle registration changes during 1994. Where data reported by the States were incomplete for these vehicles, estimates were made by the Federal Highway Administration. Truck-tractors may include some large trucks used regularly in combination with full trailers.
 4 Except for Georgia and Mississippi (Footnote 5), farm registrations are shown for all States that have a

special "Farm" classification. The numbers of vehicles shown do not necessarily represent the total number or registered vehicles used on the farm. The following farm trucks, registered at a nominal fee and restricted to use in the vicinity of the owner's farm, are not included in this table: Connecticut, 9,378; New Hampshire, 3,786; New Jersey, 6,005; New York, 15,736; Pennsylvania, 22,282; and Rhode Island, 1,073.
 5 Personal passenger vans, passenger minivans and utility-type vehicles are no longer included in automobiles on table MV-1. Personal passenger vans, passenger minivans and utility-type vehicles are now included in trucks on table MV-9. Pickups, panels, and delivery vans are generally of 10,000 pounds or less gross vehicle weight.
 6 Although Georgia and Mississippi have a special "Farm" classification, their registration reports do not show a complete segregation of farm trucks from private carriers.
