 - ❖ NCFRP Project 38 – Improving Freight System Performance in Metropolitan Areas
- ❖ Co-authors: J. Holguín-Veras, J. Wojtowicz, M. Browne I. Sánchez, M. Jaller, C. González, D.G. Haake, and S.D. Hodge

Background Considerations

Congestion problems are not new...

4

37th Street and 7th Avenue, New York City, 1945

Freight in metropolitan areas is growing...

5

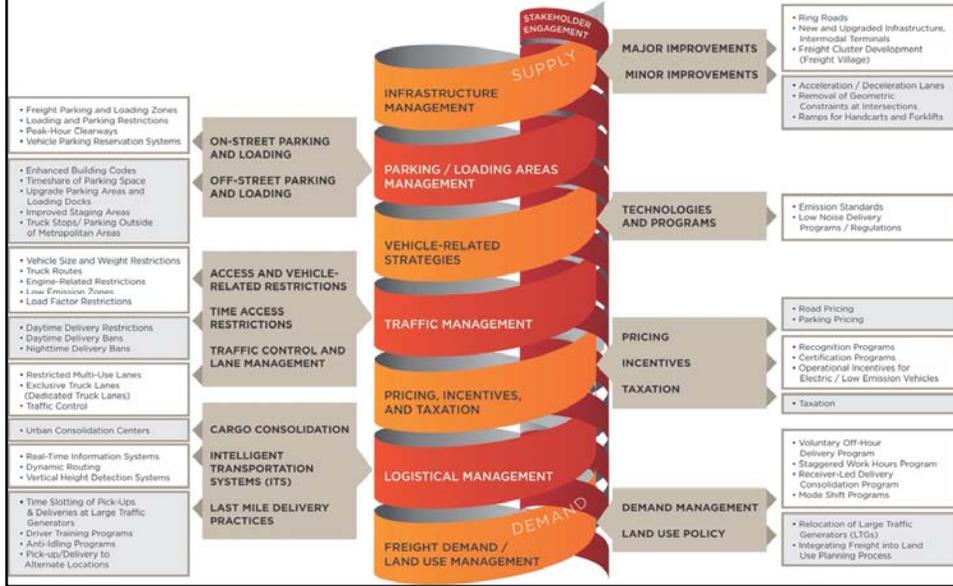

- ❖ In the US, 80% of the cargo transported in the country has origins or destinations in the top 100 metropolitan statistical areas
- ❖ Freight transported varies among metropolitan areas:
 - ❖ In average, 20-30 kg/person-day
- ❖ More people are moving to urban areas → needs for cargo increase
- ❖ Amount of cargo transported increases with income
 - ❖ rising incomes → more challenges to the system

What Could the Public Sector do?

NCFRP Report 33 "Improving Freight System..." ⁷

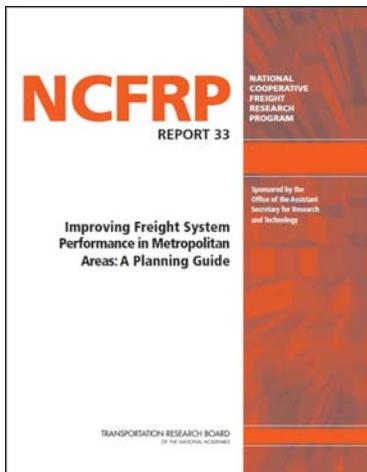

Planning Guide: Versions ⁸

❖ **Print ready version:**

What is known about these initiatives?

We asked experts and practitioners...

10

- ❖ Survey designed and disseminated worldwide
- ❖ Conducted in Summer 2017
- ❖ Three sections
 - ❖ Most familiar city
 - ❖ Assessment of each initiative
 - ❖ Familiar?
 - ❖ Implemented?
 - ❖ Most positive impact
 - ❖ Most negative impact
 - ❖ Impacts: Congestion, Delivery Costs, Emissions, Safety, Livability

Descriptive Summary

11

- ❖ 48 complete responses (75 in total received)
 - ❖ 21% Practitioners/Planners
 - ❖ 79% Researchers/Academics
- ❖ Information collected from:
 - ❖ 19 Countries
 - ❖ 37 Cities
- ❖ Most represented cities
 - ❖ Rome (4)
 - ❖ NYC (3)
 - ❖ Paris, London, Mexico City, Sydney and Brussels (2)

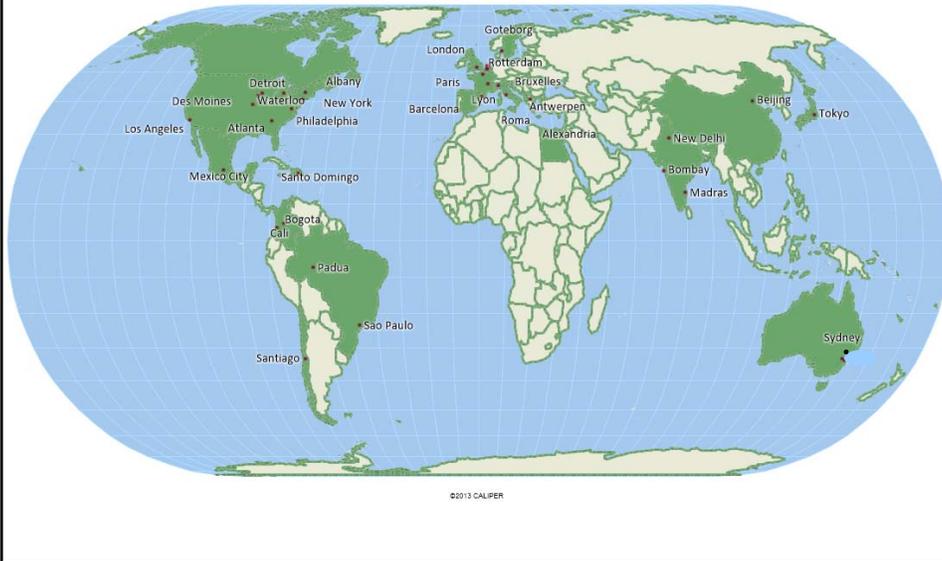

Countries in the Sample

12

Cities in the Sample

13

Preliminary Findings

Results – Overall Initiatives (1/2)

15

- ❖ Most Familiar: Daytime Delivery Restrictions (93%)
- ❖ Most Implemented: Vehicle Size and Weight Restrictions (84%)

Define the conditions under which freight vehicles can circulate in the network

Results - Overall Initiatives (2/2)

16

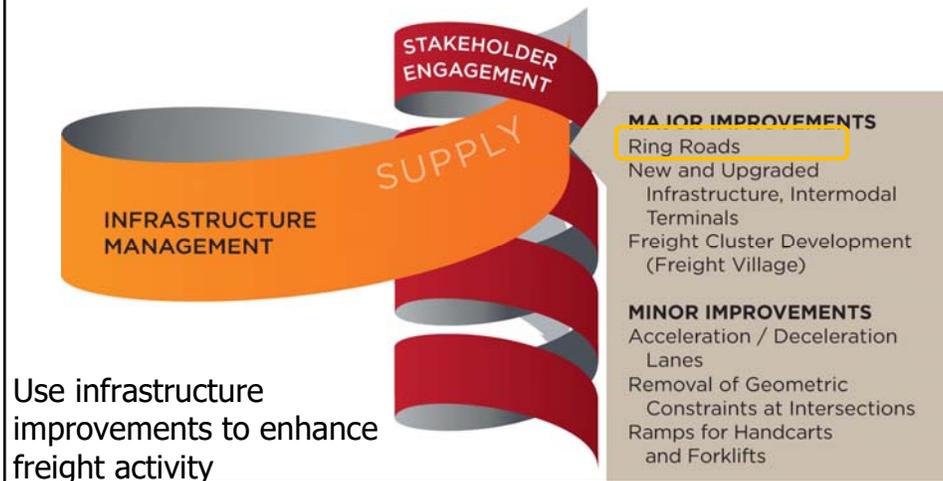

- ❖ Least Familiar:
 - ❖ Vertical Height Detection Systems (40%)
- ❖ Least Implemented:
 - ❖ Exclusive Truck Lanes (Dedicated Truck Lanes) (5%)

Results (1/6): Infrastructure Management

17

❖ Most Familiar/Implemented: Ring Roads (80%/58%)

Results (2/6): Parking / Loading Areas Management¹⁸

❖ Most Familiar: Freight Parking and Loading Zones (86%)

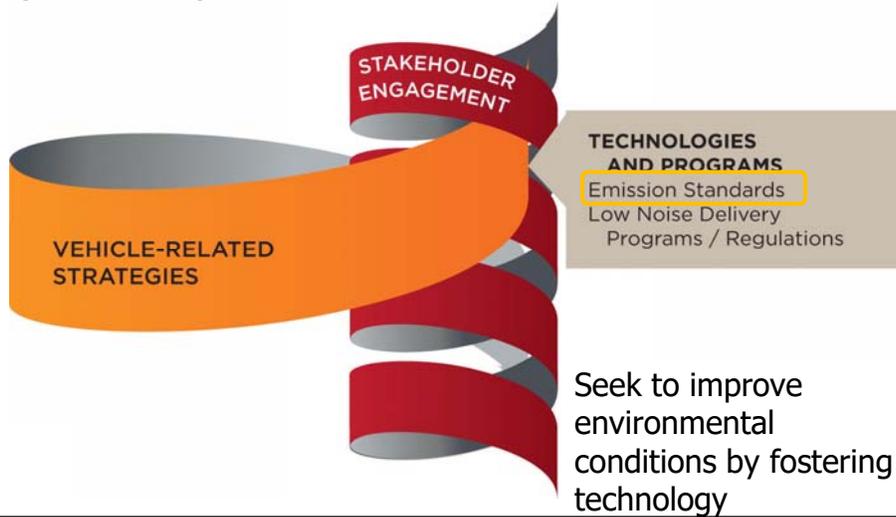

❖ Implemented: Loading and Parking Restrictions (69%)

Results (3/6): Vehicle-Related Strategies

19

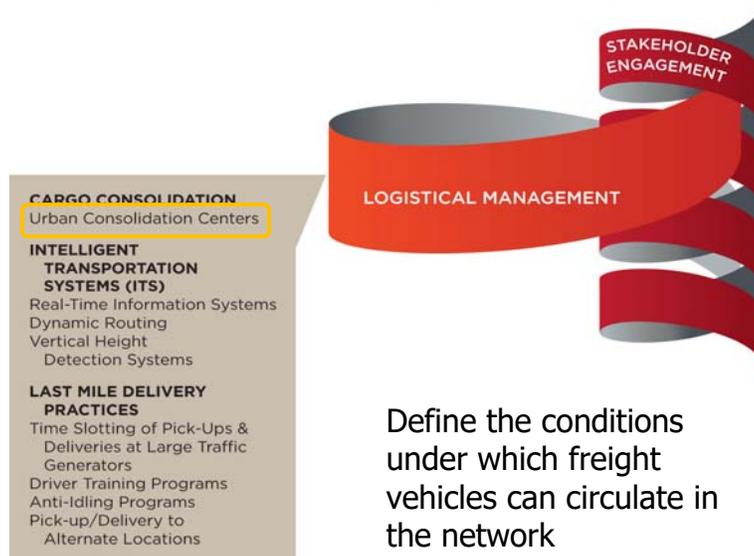

- ❖ Most Familiar/Implemented: Emission Standards (80%/58%)

Results (4/6): Logistical Management

20

- ❖ Most Familiar/Implemented: UCCs (86%/39%)

Results (5/6): Pricing, Incentives and Taxation 21

- ❖ Most Familiar/Least Implemented: Road Pricing (83%/27%)
- ❖ Most Implemented:
 - ❖ Operational Incentives Low Emission Vehicles (45%)

Results (5/6): Freight Demand / Land Use Management

- ❖ Most Familiar: Voluntary Off-Hour Delivery Program (86%)
- ❖ Implemented: Integrating Freight into Land Use Planning (53%)

What about the impacts?

Analysis of Impacts (1/3)

24

- ❖ Positive Impacts of Initiatives
 - ❖ 63% → Improve Congestion – Significantly or Slightly
 - ❖ 25% → Reduce Emissions – Significantly or Slightly
- ❖ Negative Impacts of Initiatives
 - ❖ 57% → No negative effect
 - ❖ 43% → Increase Delivery Costs – Significantly or Slightly
- ❖ No Positive Effect
 - ❖ Nighttime Delivery Bans (32%)
- ❖ No Negative Effect
 - ❖ Real Time Information Systems (94%)
 - ❖ Recognition Programs (90%)

Analysis of Impacts (2/3)

25

- ❖ No Negative Effect (Stakeholder Engagement)
 - ❖ Educate Elected Officials (100%)
 - ❖ Develop Material and Hold Events to Raise Awareness about Freight (100%)
 - ❖ Provide Information about Urban Policies to the Private Sector (100%)
 - ❖ Designate a Freight-Person at Key Agencies (94%)
 - ❖ Provide a Platform for Stakeholders to Identify Problems and Solutions (94%)

Impacts (3/3) – Stakeholder Engagement

26

STAKEHOLDER ENGAGEMENT

- Designate a 'Freight-Person' at Key Agencies
- Create a Freight Advisory Committee (FAC)
- Educate Elected Officials
- Create a Technical Advisory Committee (TAC)
- Create a Freight Quality Partnership (FQP)

Impact: Improve Public-Private Relations

Closing Remarks

Final Thoughts

28

- ❖ Improving freight system performance is needed
- ❖ There is a wide range of initiatives
 - ❖ Multi-prong approaches are key
 - ❖ Every situation is different, local conditions matter...
- ❖ Trade-offs must be analyzed. If congestion improves delivery costs may increase. A balance should be reached
- ❖ Some under-utilized initiatives have great potential
- ❖ Traditional initiatives have not provided the best impacts. Even if practitioners are familiar with them, implementation does not always take place

We Need to ...

29

- ❖ Undertake a holistic transformation of supply chains, inducing changes in behavior at key agents
- ❖ There is a space for collaboration. Involve all key stakeholders
- ❖ Transform existing freight policy and embrace innovation in urban freight
 - ❖ New trends and technology
- ❖ Use the tools available

Thanks!
