(1) Totals may not equal sum of parts due to rounding. Data is not available for older age groups (i.e., ages 70 and older) prior to 1994.

(2) Variances in Under 16 drivers reflect changes in the reporting requirements for this age cohort over time. Starting in 1990, States were required to only report the number of drivers under 16 with full driving privileges. In 2006, to reflect growing use of Graduated License Programs, States were required to include drivers with provisional licenses. In 2012, States were required to exclude drivers with learner permits.

(1) Totals may not equal sum of parts due to rounding. Data is not available for older age groups (i.e., ages 70 and older) prior to 1994.

(2) Variances in Under 16 drivers reflect changes in the reporting requirements for this age cohort over time. Starting in 1990, States were required to only report the number of drivers under 16 with full driving privileges. In 2006, to reflect growing use of Graduated License Programs, States were required to include drivers with provisional licenses. In 2012, States were required to exclude drivers with learner permits.

TABLE DL-220 LICENSED DRIVERS, BY SEX AND AGE GROUP, 1963-2020 (1)

(1) Totals may not equal sum of parts due to rounding. Data is not available for older age groups (i.e., ages 70 and older) prior to 1994.

(2) Variances in Under 16 drivers reflect changes in the reporting requirements for this age cohort over time. Starting in 1990, States were required to only report the number of drivers under 16 with full driving privileges. In 2006, to reflect growing use of Graduated License Programs, States were required to include drivers with provisional licenses. In 2012, States were required to exclude drivers with learner permits.

TABLE DL-220 LICENSED DRIVERS, BY SEX AND AGE GROUP, 1963-2020 (1)

(1) Totals may not equal sum of parts due to rounding. Data is not available for older age groups (i.e., ages 70 and older) prior to 1994.

(2) Variances in Under 16 drivers reflect changes in the reporting requirements for this age cohort over time. Starting in 1990, States were required to only report the number of drivers under 16 with full driving privileges'. In 2006, to reflect growing use of Graduated License Programs, States were required to include drivers with provisional licenses. In 2012, States were required to exclude drivers with learner permits.

TABLE DL-220 LICENSED DRIVERS, BY SEX AND AGE GROUP, 1963-2020 (1)
