Cambridge, MA

This is in reference to Promise Otaluka's April 19, 2011 email that transmitted the Massachusetts Department of Transportation's (MassDOT) April 12, 2011 SEP-14 workplan for the use of the Task Order Contracting delivery method. MassDOT proposes to use Task Order Contracting to construct a number of improvements under the Low Cost Stop-Controlled Intersection Countermeasures Program to ameliorate crashes, serious injuries and fatalities.

The use of task order contracting delivery will provide greater flexibility in the programming, design and construction of individual safety locations throughout the state.

The MassDOT's workplan and proposed schedule for evaluation are satisfactory. You may consider this project approved for evaluation under SEP-14. Thank you for the opportunity to review and comment on this SEP-14 request. Should you have any questions, please contact Gerald Yakowenko at (202) 366-1562.
