Administration**

Memorandum

Subject: **ACTION:** Alternative Technical Concepts (ATCs) for
Staging and Maintaining Traffic under
Special Experimental Project No. 14 (SEP-14)

Date: July 17, 2013

/Signed By:/

From: Charles W. Bollinger
Acting Director, Office of Program Administration

In Reply Refer To:
HIPA-30

To: Russell L. Jorgenson
Division Administrator
Lansing, MI

This is in reference to Jeff Forster's July 15 email that transmitted the Michigan Department of Transportation's (MOOT) July 8, SEP-14 workplan; for the use of Alternative Technical Concepts (ATCs) for staging and maintaining traffic on the I-75 rehabilitation project from Pinconning Road to the Bay/ Arenac County Line.

This contracting method will allow MOOT to receive and evaluate innovative staging and traffic control plans. Contractors will receive MDOT's conceptual approval and will be able to use their ATC in their bid proposal, thus fostering innovation and potentially reducing the construction time and inconvenience to the travelling public.

The MDOT's workplan and evaluation schedule are satisfactory. You may consider this project approved for evaluation under SEP-I 4. Thank you for the opportunity to review and comment on this SEP-14 request. Should you have any questions, please contact Gerald Yakowenko at (202) 366-1562.
