Memorandum

Subject: **ACTION:** Job Order Contracting Project Delivery under
Special Experimental Project No. 14 (SEP-14)

Date: December 11, 2013

From: /S/ Peter Kleskovic
Acting, Director, Office of Program
Administration

In Reply
Refer To: HIPA-30

To: Robert J. Clark
Division Administrator
Trenton, NJ

This is in reference to Matthew Zeller's December 5 email that forwarded a work plan from the New Jersey Department of Transportation (NJDOT) for job order contracting under Special Experimental Project No. 14. NJDOT plans to use job order contracting to implement bridge preservation and preventive maintenance activities. This will provide greater flexibility in the programming and implementation of various bridge preventive maintenance needs.

Please ensure that the NJDOT provides an annual evaluation that addresses the schedule and cost efficiencies associated with this delivery method. Specifically, the evaluations should provide for a comparison of the cost, quality and schedule aspects for this delivery method in comparison with the traditional means of delivering preventive maintenance work.

Subject to the above comment, the JDOT s work plan is satisfactory and you may consider this project approved for evaluation under SEP-14. Thank you for the opportunity to review and comment on this SEP- 14 request. Should you have any questions, please contact Gerald Yakowenko at (202) 366-1562.
