

Drive Out At Stop Sign

Frequency: 277 cases; 9.3% of all crashes

Severity: 10% resulted in serious or fatal injuries

Description: The crash occurred at an intersection at which the motorist was facing a stop sign.

Summary: In comparison to all crashes, this crash was more likely to involve teen (age 15 to 19) and adult (age 25 to 44) bicyclists. More than 3/4 of these events occurred in urban areas.

The light condition, number of lanes, and speed limit parameters closely followed the results for all crashes combined.

About 60 percent of the bicyclists were riding facing traffic, whether “in road” or “off road.”

This type of crash tended to be less severe than the average.
